

KARTIK BHANDARE

Full Stack Developer

kartikbhandare57@gmail.com | +91 7303434164 | [LinkedIn](#) | [LeetCode](#) (400+) | Pune, MH, India

SUMMARY

Java Full Stack Developer with hands-on internship experience at Cognifyz Technologies and a track record of building AI-integrated, production-grade systems. Projects span microservices architecture (Kafka, Keycloak, Spring AI), LLM-powered Chrome extensions, and AI-agent CRM systems using LangGraph and Groq. Targeting SDE, Backend, or Full Stack roles where Java depth and AI integration create real product value

EXPERIENCE

Cognifyz Technologies — Java Developer Intern | Dec 2025 – Mar 2026

- Engineered modular Java 17 applications leveraging OOP, Collections Framework, Exception Handling and File I/O for clean, maintainable code
- Orchestrated REST API integrations with JSON processing pipelines, implementing robust input validation and structured error handling

PROJECTS

Fitness Tracker Microservice | [GitHub](#) · [Live](#) | Spring Boot · Kafka · Keycloak · Eureka · Spring AI · Docker · React

- Decomposed monolithic fitness application into 4 independently deployable microservices (User, Activity, AI Recommendation, API Gateway) with Eureka service discovery and Spring Cloud Config for centralized configuration across environments.
- Built Kafka event pipeline between User and Activity services enabling async, non-blocking communication — decoupling services and eliminating direct dependency failures.
- Configured Keycloak OAuth2/OIDC with 3 user roles (Admin, Trainer, User), enforcing token-based authorization at the API Gateway layer for zero-trust access control.

PharmaConnect CRM AI-Log | [GitHub](#) · [Live](#) | React · Redux Toolkit · FastAPI · PostgreSQL · LangGraph · Groq API · Docker

- Architected AI-powered CRM backend using FastAPI and PostgreSQL with multi-rep data isolation via row-level security, supporting concurrent field rep sessions with isolated interaction histories.
- Built LangGraph-based agent orchestration pipeline integrating Groq LLaMA API, enabling multi-step reasoning for visit planning recommendations — reducing manual workflow steps for field reps.
- Developed React + Redux Toolkit frontend with dark-themed responsive UI, implementing optimistic updates and async state management for real-time CRM interactions

Email Writer AI | [GitHub](#) | Spring Boot · Spring AI · Gemini API · JavaScript · Chrome Extension API

- Built an AI-powered Chrome Extension that integrates with Gmail to generate context-aware email replies using Google Gemini API.
- Developed Spring Boot backend using Spring AI framework to handle REST communication between Chrome Extension and Gemini LLM.
- Engineered multi-tone prompt templates (Professional, Friendly, Formal) with structured JSON response parsing, achieving context-relevant reply generation in under 2 seconds average API round-trip latency

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science Engineering

Jul 2022 – Jun 2026

Ajeenkya DY Patil University, Pune

CGPA: 7.68 / 10 | Specialization: Software Engineering

KEY SKILLS

LANGUAGES: Java, JavaScript, Python, SQL | **BACKEND:** Spring Boot, Spring Security, Spring AI, Spring Data JPA, Node.js, Express.js, JUnit 5, Mockito, Hibernate, REST APIs, JWT, RBAC, Maven, Microservices | **FRONTEND:** React.js, HTML5, CSS3 | **DATABASES:** MySQL, PostgreSQL, MongoDB | **CLOUD & DEVOPS:** AWS, Docker, Kafka, Kubernetes, Git, GitHub Actions, CI/CD, Postman, Swagger/OpenAPI | **CORE:** DSA, OOP, System Design

CERTIFICATION

Oracle Cloud Infrastructure 2025 Associate | NPTEL Java — Gold Certificate
